# About.

---

## INTRODUCTION TO HABITAT

---

In ecology, a habitat is the type of natural environment in which a particular species of organism lives and thrives - places where shelter and protection can be found.

The Habitat modular lounge creates collaborative work settings designed to support small tribes of four to eight or more students - providing a safe space to relax and restore or focus and grow.

Habitat offers ten lounge and worksurface pieces: straight and curved, designed to be easily configured in many different ways to accommodate the setting that is just right for your environment and the learning activities it will host.

Lounge fabric is available in select VE Furniture and Warwick fabrics.

Surface materials are available in select VE Furniture and Laminex timbers and laminates.

Glides are available in matt black finish.

This guide contains multiple products from the Habitat Modular Lounge range which have been curated into one specification guide for your convenience. Note that each product may be subject to different pricing terms and conditions based on finishes selected.
