## INTRODUCTION TO MAKER

---

Maker is an innovative, multipurpose table system designed and developed by VE Furniture.

Makerspaces are places where people come together to collaborate and learn new skills.

These environments are as unique as the people who work in them. They require flexible and customized solutions that can accommodate their unique needs.

Maker provides options that empower students to sit, stand, focus, collaborate, make and learn. With surfaces and storage solutions that are as flexible as the the lesson being taught.

Maker is the perfect collection of products to create makerspaces and learning environments that support hands on learning.

This guide contains multiple products from the Maker Table range which have been curated into one specification guide for your convenience. Note that each product may be subject to different pricing terms and conditions based on finishes selected.

## MAKER FLEXIBLE LEG + STORAGE PROFILES

Multiple base and frame options provide options for every area of learning.

Maker's flexible storage plinth design can be configured with a range of accessories including tote boxes, drawers, doors, cabinets and open shelving.

Lockable castors make moving tables a breeze and the optional raised edge profile ensures nothing falls from the table when designing, building, creating and testing.

DESIGNED BY  
VE FURNITURE
